About Us

We are dedicated to creating eco-friendly and biodegradable packaging solutions that benefit both your business and the planet.

We use recycled and naturally sourced materials, such as natural papers, greaseproof cardboard, sugarcane fibers, cereals, and grasses, to produce packaging that composts in less than 3 months. We offer customized solutions for the food, industrial, and agribusiness markets, focusing on biodegradable and compostable products that help reduce environmental impact.

Our commitment to quality and customer satisfaction drives us to work as a team, use resources efficiently, and constantly innovate. We aspire to be leaders in the biodegradable and compostable packaging market, promoting sustainable practices that benefit our customers and the environment.

Kraft Paper Products

Kraft paper is eco-friendly, recyclable, biodegradable, and fully reusable. Its aesthetic makes it a widely used material in the world of design. Kraft paper with a higher grammage can be perfect for printing the business logo and thus transmitting the brand image.
